**2014 Annual Report**

## **FOREWORD**

The Field Health Service Information System (FHSIS) is the official information system of the Department of Health (DOH). The FHSIS enables the collection and translation of information from local to national level. It includes figures on health status, health service coverage, health systems and notifiable diseases in the country. The DOH is launching the 2014 FHSIS Report highlighting the accomplishments made in health service delivery in pursuit of Universal Health Coverage or Kalusugan Pangkalahatan.

This report is dedicated to all health workers in barangays, municipalities, cities and provinces who continue to provide quality health care services to every Filipino. This annual report is made possible because of our zealous health workers who endeavor to report accurate data on the FHSIS. This publication is in recognition of all their efforts in ensuring that relevant information is made publicly available for policy formulation and decision making.
